ARTICLE 5 - ADMISSION TEST: CONTENTS - EVALUATION CRITERIA - DURATION.
1. The admission test is the same for all applicants and will be prepared by the CINECA on behalf of the
University. The admission test consists in answering 60 (sixty) questions in English with five response options, of which the candidate must identify only one, discarding the wrong conclusions, arbitrary or less probable, on the following topics: general culture (No. 12 questions), logical reasoning (No. 10 questions), biology (16 questions), chemistry (16 questions), physics and mathematics (6 questions), on the basis of the programme set out in Annex "A" of the Ministerial Decree of June 16th 2020 n. 218.

2. A maximum of 90 (ninety) points are attributed for the evaluation of the admission test and the following evaluation criteria apply:
   a) 1.5 points for each correct answer;
   b) minus 0.4 (-0.4) points for each incorrect answer;
   c) 0 points for each question left blank/unanswered.

   In case of equal score, the following criteria will apply:
   - prevails, in descending order, the score obtained by candidates in answering, respectively, the questions related to the topics of logical reasoning, general culture, biology, chemistry, physics and mathematics.
   - In case of further equal score, the younger candidate prevails.

   The duration of the test is set for one hundred (100) minutes.

   The admission test will take place even if the number of applications is equal to or less than the number of seats available.

**ARTICLE 6 - ADMISSION TEST: CONDITIONS OF EXECUTION - OBLIGATIONS OF CANDIDATES - SUPERVISION.**

1. At the time of the test, each candidate is given a package prepared by CINECA on behalf of the University.
   Each package contains:
   a) a personal data card without identification code that the candidate must fill in;
   b) the questions related to the admission test bearing the identification code of the envelope as well as two sheets dedicated to the draft;
   c) an answer form, with the same identification code as the envelope;
   d) a sheet with the same identification code of the envelope and the indication of the University and of the degree course for which the test is taken;
   Should it become necessary to replace even only one of the documents indicated in points b) and c), the entire envelope will be replaced as they are identified by the same code.
   Any corrections or signs made by the candidate on the personal data card do not imply its replacement. The replacement is provided only if the signs or corrections involve an objective difficulty in identifying the candidate: in that case, the Board will replace the personal data card by taking one of the reserve parcels and the operation will be acknowledged in the classroom minutes. In any case, the replacement of the personal data card never implies the replacement of the entire package.
   Before the beginning of the test, the President of the Board of Exam draws 4 (four) students among the candidates and verifies with them the integrity of the boxes, opens them and starts distributing the envelopes among candidates, and gives each candidate the "instruction sheet explaining how to fill in the answer form". The instruction sheets are distributed before the beginning of the test.
The President of the Exam Board draws up and signs, for these operations, a specific declaration - a classroom report, indicating:
1.1) the verification of the integrity of the boxes;
1.2) the number of envelopes assigned;
1.3) the number of envelopes not used;
1.4) the number of envelopes eventually replaced and the reason.

This declaration must also be signed by the 4 students drawn for the verification of the integrity of the envelopes containing the competition material.

On the day of the test, the president of the Exam Board also prepares a classroom report prepared according to the format made available by the MIUR.

In the event that one or more candidates report any irregularities regarding the envelope received, the President of the Exam Board verifies its reliability and, if necessary, replaces the envelope. This operation must result from the classroom report together with the related reasons. The replaced envelopes are not to be considered as waste material but must be kept by the University.

For the completion of the answer form, candidates must only use an indelible black pen, provided by this University and must mark the chosen answer by placing an X in the corresponding box. Only once may candidates correct the answer already given, taking care to completely blacken the previously traced box and choosing another one: in any case, only one of the five boxes must be marked with an X, otherwise no answer is considered to be given.

The answer form provides, in correspondence with the progressive number of each question, a small circular figure that the student must check only if he intends to give certainty that he/she will not answer. This indication, once affixed, can no longer be changed; if the candidate does not put any sign in the answer boxes, even if he does not bar the circular figure, the answer is considered not given.

On the answer form - for the purpose of determining the relative score - there must be no sign or any identification mark, otherwise the test will be considered invalid.

At the end of the test, the candidate goes to the dedicated station, placed at a reasonable distance from the Board, and is invited to choose a pair of identical adhesive labels. Each identical label must be applied by the candidate on the answer form and on the personal data sheet. The candidate must verify that the alphanumeric codes printed on the labels of the chosen couple correspond. Therefore, the candidate must undersign the declaration of truthfulness of the personal data and correspondence of the codes of the labels applied to the duly completed data sheet and the answer form. At the end of these operations, the candidate must insert the personal data card in the sealed container present in the dedicated station and go to the Board's location where he inserts the answer form into the closed container prepared therein.

In addition to the answer form and the personal data sheet, the candidate must also turn in all the residual material contained in the envelope delivered at the beginning of the test.

The president of the Board then proceeds:

- to count the answer forms, keeping the page facing down so that nothing is shown and inserting them in one or more containers that must be closed in the presence of the same candidates called to verify the integrity of the boxes or, in case of their impossibility, in the presence of 4 other candidates drawn by lot;
to insert all the data sheets in one or more containers that must be closed in the presence of the same candidates called to verify the integrity of the boxes or in any case of other 4 candidates drawn by lot;

to sign the closing flaps of the container or containers and to invite the 4 students to sign on the same flaps

to pack other containers in which to enclose the replaced envelopes, the parcels containing the replacement data sheets as well as the unused envelopes, the declaration referred to in this article and the copy of the classroom reports, provided of the lists of candidates.

2. During the test, it is forbidden for candidates to keep, bags, backpacks, books or notes, pens, pencils or markers, mobile phones and other electronic devices, including "smartwatches", PDAs, and tablets, earphones and webcams and portable personal computers of any type able to connect via "wireless" connections, or to the normal telephone network with UMTS, GPRS, GSM protocols, under penalty of cancellation of the test. Therefore, candidates who possess such equipment will have to turn them in to the identification staff before entering the room or in the area where the candidate was assigned to perform the test.

It is forbidden to introduce manuals, school textbooks, handwritten notes and reference material and blank sheets. During the test, candidates are not allowed to communicate with each other verbally or in writing, or to relate with others, except with the members of the Board or the Supervisory Committee or with the technical-administrative staff responsible for supervision.

The candidate who contravenes the provisions of this article is excluded from the competition.

3. Any further information regarding the manner in which the test is conducted and the time spent in the classroom will be made known by a subsequent provision, or with the information made available to the candidates by the Board in the classroom, following the indications provided with the MIUR guidelines.

ARTICLE 7 - REASONS FOR CANCELING THE TEST

Causes for cancellation of the test:
1. the performance of the test by the candidate in an exam room other than the one in which the candidate is included, taking into account the distribution lists, unless the variation has been authorized by the exam Board and the variation is recorded in the classroom minutes;
2. the introduction and subsequent use of mobile phones, PDAs, smartphones, smartwatches, tablets, webcams, headsets or other similar instruments, manuals, school textbooks and/or even their partial reproduction, handwritten notes and consultation material;
3. the affixing on the answer sheet (both on the front and on the back) of the signature or of the marks of the candidate or of a member of the Board;
4. the interaction between the candidates and/or copying attempts and/or attempts to exchange any material, including the exchange of personal data and/or answer sheet, in the possession of the candidates.
5. the use by the candidate, during the insertion of the personal data sheet and the answer form inside the containers, of pens, pencils or any other suitable instrument for writing in order to make changes, additions and/or corrections to the answer sheet.
The Exam Board orders the cancellation of the test. In the cases referred to in numbers 1, 2, 3, 4, and 5, CINECA does not determine the score of the test.

The test is also subject to cancellation in case the candidate uses, after the end of the test, pens, pencils or any other suitable instrument for writing in order to make changes, additions and/or corrections to the answer sheet, and in the case in which the personal data sheet contains cancellations and/or abrasions or indicates data which, at the unquestionable judgment of the Exam Board, does not allow to trace with certainty the author of the test.
